

# ZIOSTATION2

## ADVANCED VISUALIZATION AND ANALYSIS

Ziostation2's powerful vendor-neutral and multi-modality software only solution offers far more than superb image quality. A full suite of regulatory approved advanced 3D and 4D functional analytical tools provides consistent functionality across the enterprise, without compromise. Workflow optimization tools, such as a customizable user interface, automated pre-processing, macros and segmentation, maximize workflow efficiency, and multiple models of implementation and delivery ensure an option that is just right for you.

Ziostation2 is compatible with any DICOM imaging modality data set including:

- CT
- MR
- PET
- Nuclear Medicine
- X-Ray Angio
- Ultrasound

And allows advanced diagnostic applications for multiple medical specialties such as:

- Cardiology
- Radiology
- Neurology
- Orthopedics
- Oncology
- Interventional Planning

### Full Suite of US Regulatory-Cleared Applications

- 3D, 4D, MIP, MPR, CPR, Multi-Modality Viewer, Multi-data fusion, Vessel analysis
- An extended list of advanced specialty applications such as Coronary Analysis, Cardiac Function (CT and MR), Calcium scoring, TAVR, Perfusion, Volume Perfusion, Pulmonary, Liver, Colon, Lesion, CT/SPECT Cardiac Fusion, EP Planning, MR Tractography, PET/CT Fusion, Physiodynamics, InVivo and others

### The Workflow Leader

- Customizable protocols and workflows allow different user types to configure the system to their unique needs
- Ziostation2 allows workspaces to be saved, enabling various users to access and interact with the same case at any point along the path of care
- Key images can easily be sent to PACS for inclusion in the patient record
- Automated rules-based pre-processing maximizes workflow efficiency
  - Customizable action macros perform multiple processes with simple clicks
  - Sophisticated automatic segmentation algorithms employ anatomical analysis, targeting specific objects to maximize accuracy

#### Japan Office

1-4-28 Mita, Minato-ku, Tokyo, 1080073, Japan
